

# Happy Web Services MarketPlace Offer:

## List of needed functionalities:

1. Admin users
  - Add/edit/delete/view users
2. Pages
  - add / edit / delete pages (images, videos and animations can be added to the page)
  - pages sort system (intuitive arrows)
  - active/inactive status (in case you do not want to publish the page once you have edited it)
  - configurable meta elements from the administration interface
3. Slider – home page
  - add / edit / delete images
  - sorting system for slide (intuitive arrows)
  - active / inactive status
  - configurable meta elements
4. Banners – home page but not only
  - add / edit / delete images
  - sorting system for banners (intuitive arrows)
  - active / inactive status
  - configurable meta elements
5. Partners – home page but not only
  - add / edit / delete images
  - sorting system for partners (intuitive arrows)
  - active / inactive status
  - configurable meta elements
6. Services categories
  - Add/edit/delete/view/active-inactive services categories
7. Services
  - Add/edit/delete/view lists – needed for custom forms
  - Add/edit/delete/view/import from excel - list items - these will be options in custom forms
  - Service custom forms – for all types of services we need some fix elements (zip/postal code or some address field, about the job – text area, email or phone, etc) and some optional elements (datepicker, time picker, hours needed for the job, number of rooms, number of furniture items, etc)
  - Service custom forms composer – allows the admin to add and remove form elements for each individual service
  - Service key features – image and small text boxes for each service – we can display them as 2-3 or 4 on the page

- Service detailed key features – similar to the previous point but the image should be just an icon and more text - like 1-2 paragraphs for each key feature (here is important to have a similar number of words to have these items display nice)
  - Services FAQ – add/edit/delete/view/order/active-inactive question and answer in the system – on front-end we will probably display them as an accordion
  - Service client testimonials or reviews – with a short testimonial and stars rating - add/edit/delete/view/order/active-inactive
  - Service image slider or background image - add/edit/delete/view/order/active-inactive
8. Professionals
- Admin – professionals - add/edit/delete/view/order/active-inactive – account functions
  - Approve professionals accounts form – or button – on approval there will be a notification sent to the professional
  - Professional companies – add/edit/delete/view/order/active-inactive
  - Professional jobs history – view
  - Professional payments history
  - Professionals – reviews of services with stars rating (you decide if the rating is visible on site)
  - Professionals accounts system – register, authenticate, password recovery with notifications on register and password recovery (the system will not store passwords as plain text so when a professional needs to recover his password he needs to get a link on his email address and this link needs to have an expiration time)
  - Payment gateway integration for professionals – if they pay to use the system
  - Professionals subscriptions plans - add/edit/delete/view/order/active-inactive – you define de subscription plans (you can make a subscription inactive for new registration but keep it for ongoing subscriptions)
  - Professional earnings management system – get paid for completed jobs, view payments history, transfer money to own account
  - Active jobs search – professionals can search active jobs and view job details
  - Apply to a job – send an offer for the job – a notification can be sent to the customer and also the professional will get notified in his account and also on e-mail
  - Job applications history
  - Job completion – we need to define how a job gets completed and if this implies payments and notifications
9. Customers
- Admin - add/edit/delete/view/order/active-inactive – customer account functions
  - Customers accounts system – register, authenticate, password recovery with notifications on register and password recovery (the system will not store passwords as plain text so when a customer needs to recover his password he needs to get a link on his email address and this link needs to have an expiration time)
  - Jobs – add/edit/view/active-inactive – post and administrate own jobs
  - Jobs history
  - Job applications – ability to accept an application and manage job progress
  - Transactions history
  - Customer payment gateway integration

- Customer reviews and stars rating for professionals (a customer can review and rate a professional only if that professional worked on a job posted by the customer) and also system and service reviews and ratings
  - Ability to deposit and transfer money to own account
  - Ability to pay the professional for whom he accepted the application – here we should use an escrow system – when the application is accepted we should move the money from the customer account to an escrow account and when the job is finished to release the payment to the professional
10. Disputes
- Both customers and professionals can start a dispute and have the ability to upload documents that help his case
  - Administrators should settle disputes and once a dispute is settled the ruling should be definitive
11. Settings
- Add/edit/delete logo
  - Add/edit/delete social media (Facebook, Twitter, Skype, Instagram, LinkedIn, Google Plus, Youtube)
  - Add/edit/delete meta elements for pages like: home, request offer, contact form, register, login, search
  - Add/edit/delete contact info
  - Transactional e-mails by label system
12. Design work – the design will be custom and responsive to ensure your site will be usable from mobile devices as well as from computers
13. Support and consulting during project development. After the website is launched we can talk about a monthly subscription if needed.

### Price: 7000 - Euro

– we estimate we will need at least 350 working hours, so the cost per hour will be  $\pm 20$  euro/hour
